Cafe POS

Cafes and coffee shops are often a hub of activity from early in the morning until late in the afternoon. Customers order customized coffee drinks that they expect to be made quickly and correctly so they can be on their way. It is also important to ensure that bakery displays and coffee stations are stocked to make it through the morning rush. Cafes require a POS system that offers quick and easy order-taking, streamlines food and drink preparation, and expedites customer checkout so that patrons receive speedy service.

Focus POS offers a POS solution specifically designed to meet the needs of coffee shops and cafes. Our intuitive touchscreen system allows employees to manage the counter and the drive-thru through a single interface to streamline order taking, food and drink preparation and checkout. Our coffee shop POS includes 250 unique screens that can hold up to 150 buttons each – allowing for endless coffee combinations – and can be customized so that frequent items are easily accessible to speed up order-taking. Tracking daily operations through our POS system allows managers to keep a pulse on sales, inventory, marketing, labor costs and most importantly, profit margins.

- SALES
- SPEED OF SERVICE
- FOOD & DRINK PREPARATION
- REPORTING
